We would like to reiterate request to fast track processing of the repair or construction of seawall at our Zamboanga Beach Park. The current status of the seawall is really alarming.

Seawall from zone 2 to zone 5, seabar and at whole 12 are already ruined due to often surge. Seawater reached as far as about twenty (20) meters from shoreline. The water exceeded the seawall which cause for the erosion of soil beside the seawall.

Attached herewith are pictures of the seawall taken last 29 April 2021 after a week of high tide and strong wave.

For information and approval, sir.
