MARK T. LAPID

Chief Operating Officer

Tourism Infrastructure and Enterprise Zone Authority

Dear Sir:

This is in connection with the DENR Implementing Rules and Regulations requiring Water Districts to secure Environmental Compliance Certificate (ECC) as per the provision of Section 4 of PD 1586 and the Ilocos Norte Water District's Water Permit Application filed before the National Water Resources Board (NWRB) to continuously appropriate water at the Balacad Pump Stations #1, #2, #3, and #4 (also known as Ranada Pump Stations), all located at Brgy. Balacad, Laoag City, Ilocos Norte and serving various barangays in Laoag City and Brgy. Suba, Paoay, Ilocos Norte benefiting a total population of 4,645 and serving 929 total households.

For the COO's information, the first pump station in the said location was turned over to the Ilocos Norte Water District (INWD) in 1995 for its management and operation. The other pump stations were drilled and constructed through the initiative of the INWD so as to provide continuous, safe, and potable water serving the various barangays in the above said city and municipality. Attached, for your perusal, is our request letter to the Honorable Ferdinand R. Marcos Jr. dated June 28, 2002 for the INWD to construct the pump station and consequently approved it in his capacity as the then Provincial Governor of Ilocos Norte as said location was at that time presumed that it belongs to the Ilocos Norte Provincial Government (please see marginal note therein).

However, upon proper verification and coordination with the Laoag City and Ilocos Norte Provincial Assessor's Office so as to facilitate its above cited compliance to DENR regarding its Proof of Authority over the Land, it was determined by both offices that the above said Lot, where these pump stations are situated, is owned by the Philippine Tourism Authority as per herein attached copy of Tax Declaration Of Real Property with TD No.17-0071-01537 and Property Identification No. 101-06-0071-21-042 dated December 21, 2016 and its vicinity map secured by the District.

In view of the foregoing and in the name of public service, the Ilocos Norte Water District respectfully seeks permission from your end that it may be allowed to continuously utilize the above said lot in operating the Balacad Pump Stations for its appropriation of water therein and for the benefit of the concessionaires of Laoag City and Brgy. Suba, Paoay, Ilocos Norte.

Furthermore, the District would like to request for the issuance of an Authorization, to the effect that INWD is allowed to utilize the above said lot, for its compliance to the NWRB requirements and to serve as a Proof of Authority over the land for its DENR-EMB ECC application.

Please allow me to extend our utmost gratitude to your kind consideration on the above request.

More Power and God bless you always.

Respectfully yours,

JOHN M. TEODORO
General Manager

HON. FERDINAND R. MARCOS, JR.

Governor
Province of Ilocos Norte

Sir:

Prior to this, the Ilocos Norte Water District has sought the permission of the Honorable Governor to construct a deep well just a few meters away from an existing caved-in well located at the Marcos Combat Shooters Club Firing Range particularly serving one hundred twenty eight household connections of Brgy. Suba, Paoay, Ilocos Norte. To this date, the construction of the well has been completed, and its production capacity tested.

In this regard, INWD plans to install a pump house which shall be provided for with a 50 KVA power generating unit and a pump control facility. To secure the facilities, a perimeter fence shall be constructed. INWD fervently ask permission to construct a pump house and pursue incidental site development works to fully utilize the new well which will not only serve Brgy. Suba but also Barangay Nagbacalan and those in the poblacion of Paoay.

Attaching herewith a site plan for your ready perusal.

Looking forward to your Honor's preferential action.

Mabuhay!

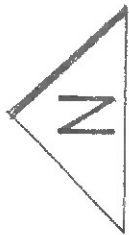

Very respectfully yours,

EMERIC S. ASUNCION
