MEMORANDUM

FOR : The Manager, Administrative Services Department
THRU : The Manager, Corporate Planning Department
FROM : The Manager, Strategic Planning Division
SUBJECT : SPD's Ms del Rosario and Ms Basto's condition
DATE : 5 January 2021

Relative to your memorandum dated 22 December 2020 requesting for medical certificates of the abovementioned talents, they both requested already from their attending physicians.

We appeal, however that they be given additional time in securing it as their movement is limited by swollen and weak legs, respectively, on top of the other physical ailments that they are experiencing as well as its effect to their psyche. For Ms. Del Rosario, attached is her previous medical certificate and the series of tests conducted to her. For, Ms Basto records from your office would reveal that she requested Philhealth Form when she got hospitalized.

Our division's communication as regards tasks and everyone's well being is daily through various platforms. We can attest to the health conditions of each one as well as teamwork in action as we fulfill our commitments.

We hope for your continued kind consideration on the matter by allowing the WFH arrangement for them. Thank you.

Anna Leah R. Bayot

ULTRASOUND REPORT

Date: **NOVEMBER 27, 2022** Ultrasound No. **20-0545**
Name: **DEL ROSARIO, EVELYN** Age: **57** Sex: **F**
Procedure: **ABDOMEN AND PELVIS** Physician: **ESTACION, MD**

Comparison:

None

Findings:

Liver is normal in size, contour and echotexture. There is moderate fatty infiltration of the liver. No demonstrable mass. Intrahepatic bile ducts are not dilated.

Gallbladder is normal in size. Wall is thin. No evident lithiasis. Common bile duct measures 0.4 cm.

Pancreas and spleen are normal in size and echotexture.

Right kidney measures 9.9 x 5.7 cm with a parenchymal thickness of 1.4 cm.

Left kidney measures 9.5 x 5.0 cm with a parenchymal thickness of 1.3 cm.

Renal contour is smooth. Kidneys are normal in size. Corticomedullary borders are defined. Pelvis and calyces are not dilated. No evident lithiasis.

Urinary bladder wall is smooth and not thickened. No evident lithiasis. Pre void volume is 248 ml. Post void volume is 8 ml.

Uterus measures 2.8 x 2.6 x 2.8 cm. Echotexture is homogeneous. Endometrial stripe is thin. Ovaries are not delineated. No adnexal mass or posterior free fluid.

Abdominal aorta is normal in caliber.

Interpretation:

- Moderate fatty infiltration of the liver.
- Atrophic uterus.
- Normal sonographic study of the gallbladder, pancreas, spleen, kidneys, urinary bladder and abdominal aorta.

CLINTON P. LAQUIDO, MD, FRCR
Radiologist
