PREVIOUS MEDICAL & DENTAL Outreach Program

A member of the medical team shares, It was a tiresome activity but nothing beats the opportunity to see a smile of relief and joy on people's faces. To know that someday, they would remember that a team visited them and did not just treat them for their pain but shared the love and care for them

This Medical mission is a very special social service method of approach to the beneficiaries because the agency is concerned not only with the physical condition of patients but their emotional and spiritual conditions as well, the volunteers were happy to see people not only getting physical healing for their health
