MEMORANDUM FOR THE CHIEF OPERATING OFFICER

FROM : The Assistant Chief Operating Officer
Assets Management Sector

SUBJECT : MABINI, BATANGAS HYPERBARIC CHAMBER

This has reference to the letter of Dr. Melanio Ramir P. Beloso, Municipal Health Officer of Mabini, Batangas requesting approval to transfer of one (1) unit HAUX 1200 multiplace hyperbaric chamber from the Mabini Health Center housing to the recently constructed five-building Mabini Community Hospital. (Please see attached)

Likewise, they requested for TIEZA to fund the said transfer of the unit to the hospital. They attached the quotation for Seven Hundred Thousand pesos (P700, 000.00) to effect the dismantling, transport, transfer, and installation.

Deutsche Motoregate, Inc (DMI), as the exclusive distributor of the HAUX equipment is recommended to implement the transfer to insure safety and proper handling without losing the warranty.

Recommendation:

1. We recommend the approval of the transfer to a better and new hospital – Emergency Department, that will better service HCS clients, and
2. Upon review of our budget, we have no available fund for the transfer of the unit due to the austerity measures (DBM Circular 580) in connection with the COVID-19 pandemic.

For your approval, Sir.

JETRO NICOLAS F. LOZADA

APPROVED:

POCHOLO J.D. PARAGAS
Chief Operating Officer

REPUBLIC OF THE PHILIPPINES
PROVINCE OF BATANGAS
MUNICIPALITY OF MABINI

July 25, 2020

Mr. JETRO LOZADA

Assistant COO, Assets Management
TIEZA

Dear Sir Lozada:

We wish to rekindle our gratitude for granting the Municipality of Mabini its own Hyperbaric Chamber. To date, we have partnered with community divers into promoting its use and have embarked on several trainings as to its operation.

Recently, the Municipality of Mabini, Batangas has recently built a public five-building health facility, known as Mabini Community Hospital, to better cater to curative needs of our municipality and nearby communities.

Its Emergency Room Department Building was designed to eventually house the Hyperbaric Chamber and we have designated two different rooms for its compressor and storage of gas tanks.

We find it useful and advantageous to transfer the said chamber to the hospital for the following reasons:

1. The location of the hospital is much nearer to the diving resorts than its present location in the Mabini Health Center. The hospital is located at the boundary of Barangay Anilao (which is the diving hotspot). In case of diving-related accidents, it can be reached within minutes by the involved divers.
2. The hospital manpower staff including doctors and nurses are on 24-hour duty and they can attend to diving-related incidents at any point in time. This is in contrast to the 8AM-5PM office hours schedule of the health center staff and with no one to man the chamber during weekends.
3. We have secured a brand new fully-equipped ambulance dedicated to the use of the hospital, and driver that can attend to and transfer patients readily.

With the foregoing, we wish to request your kindest approval for the transfer of the Hyperbaric Chamber. Similarly, as our funds are depleted by the COVID-19 pandemic, we appeal to your kind hearts to assist us in the said transfer and reinstallation of the Hyperbaric Chamber to its new and bigger permanent home.

Thank you very much for your continuous support to our municipality.

Very truly yours,

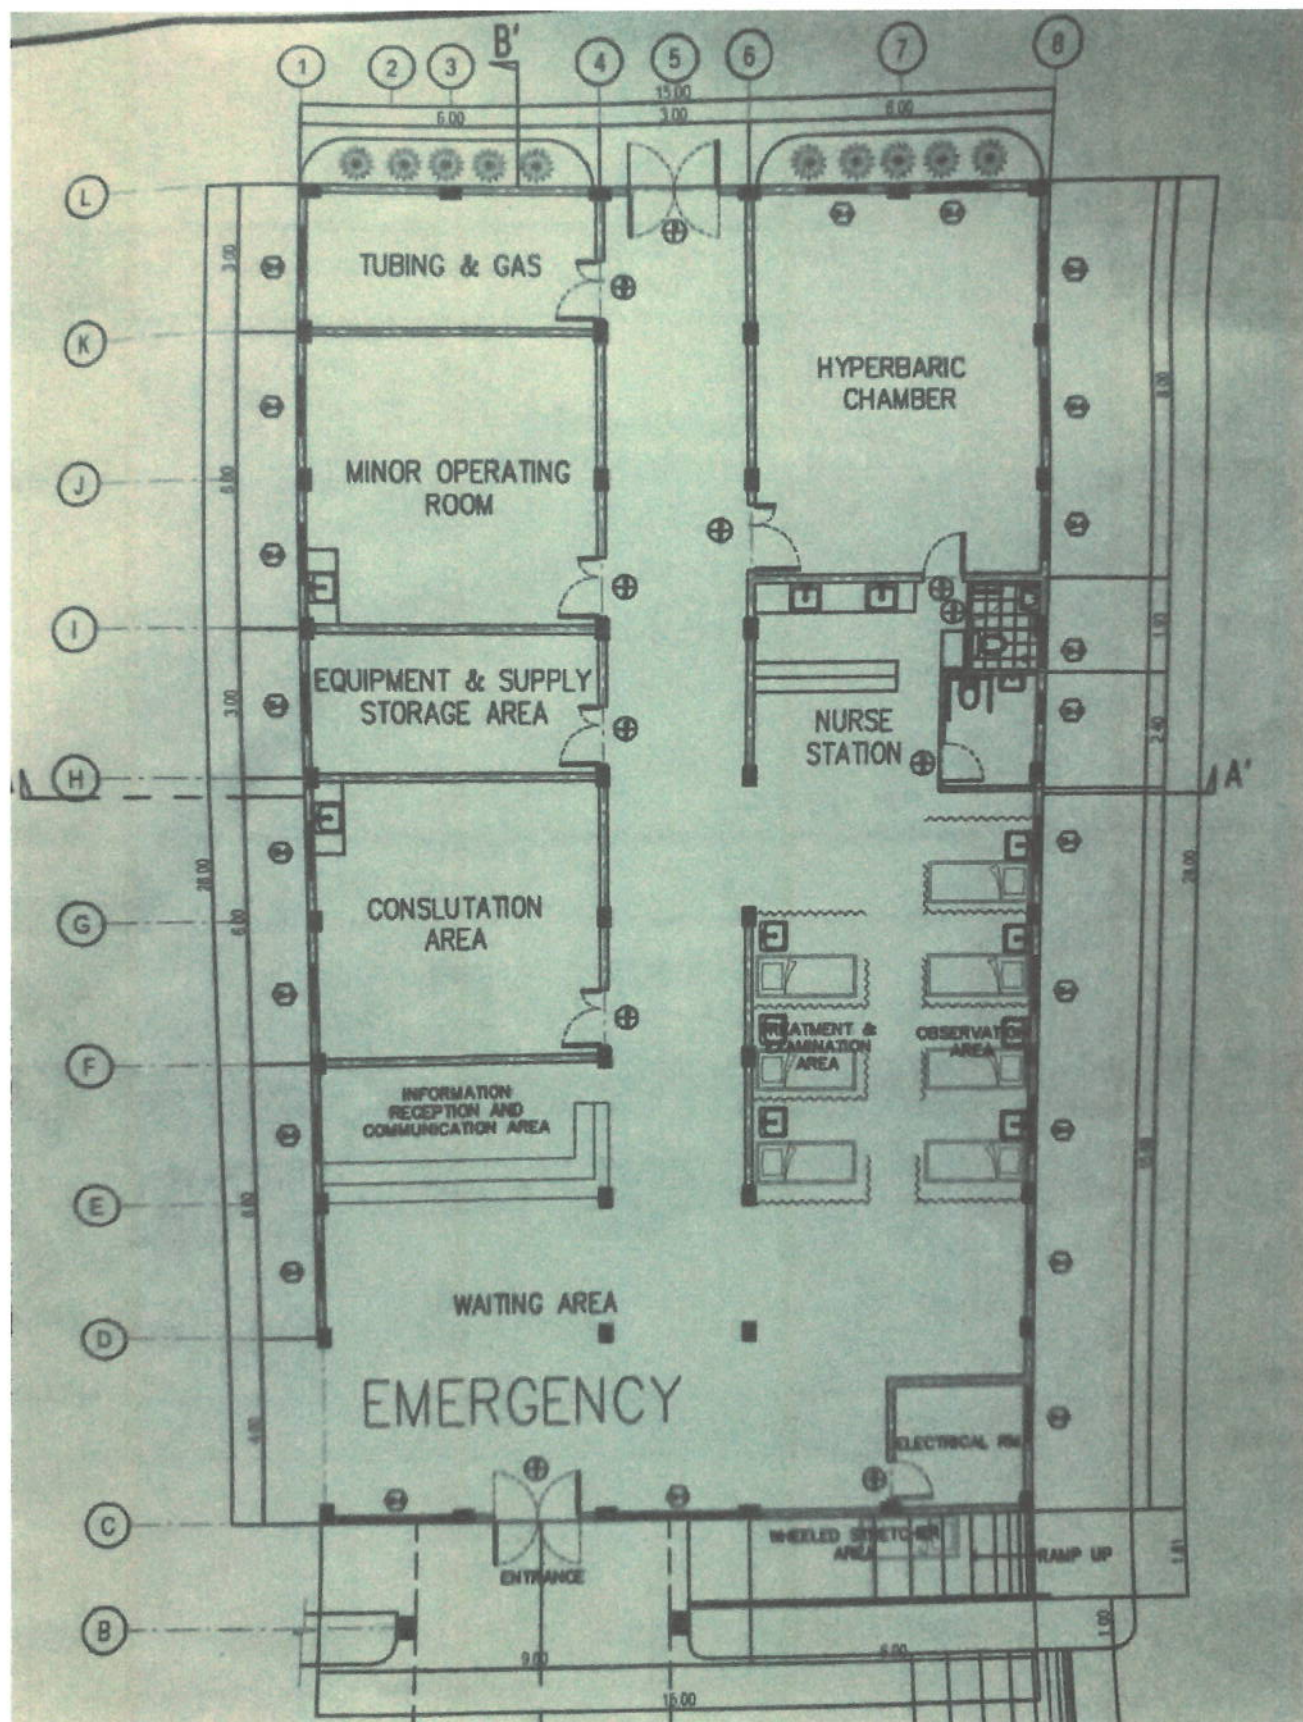

MELANIO RAMIR P. BELOSO, MD, FPCS, MHA, MPM
Municipal Health Officer
